

The logo features the word "VIGIMON" in a bold, blue, sans-serif font, with a small "TM" symbol at the end. The letters are partially obscured by a dark, circular background that has a green glow along its top edge and a pink glow along its right edge. Inside this circle, there is a faint, purple-outlined map of the state of Michigan.

WHAT ARE VIRTUAL MONSTERS?

Pets and humans have coexisted together since the beginning of time. With the introduction of Virtual Monsters, the metaverse is one step closer to being a true representation of reality. You may now own an AI-driven, 3D virtual pet companion in the form of NFTs through our network Virtual Monsters.

The huge desire for pet ownership has no physical boundaries. However, technology has also advanced to the point where tokenizing pets allows companies like Metaverse to offer virtual spaces for them. As of right now, the metaverse is thought of as the internet's and the virtual world that people will soon encounter, progressing to the next level and the Virtual Monsters platform is to do the same. With Web3 integration into our platform, it has a promising augmented reality characteristic that allows users to buy or adopt NFT pets in the metaverse. All of the 32 pets have different utilities and platforms. This allows users to buy pets and take them for walks anywhere in the virtual world, feed them, train them and help them grow with the help of our NFTs.

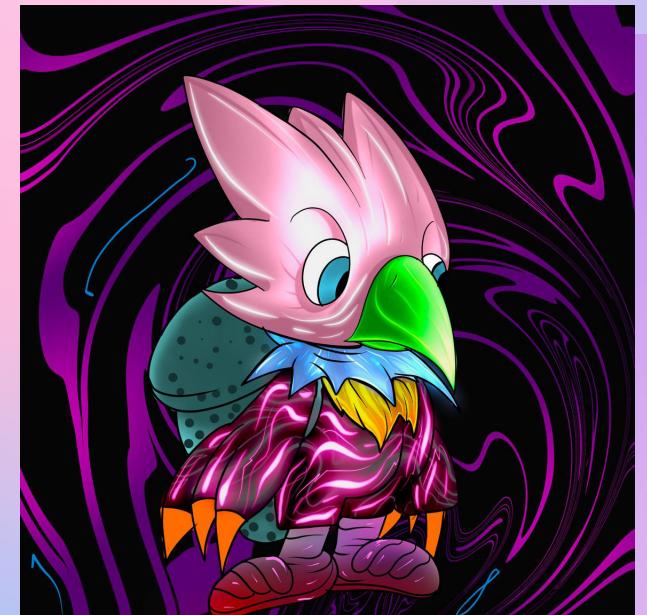

Recent technological advancements have prompted platforms such as metaverse to include virtual pets. The ongoing changes in the internet world provide an excellent opportunity to include and shape things in the metaverse. The platform that people enjoy and find simple to use is beginning to virtualize. The creators are optimistic about making this plan a reality for the users. Create an interface for people to bring their pets into the virtual world.

THE CONUNDRUM OF WEB3.0

The web 3.0 unrest will use decentralized conventions, for example, blockchain, the innovation used to work with digital currency exchanges. By resolving the central questions of information proprietorship and control, it desires to address a portion of the significant mishaps and weaknesses of the ongoing web age.

- Expanded and computer-generated reality: Clients team up, learn, play, engage, and mess around with others in a metaverse. In light of different advancements, most of which have Computer generated Reality (VR) and Expanded Reality (AR),
- Man-made reasoning (AI): Despite the way that Internet 2.0 has seen some computer-based intelligence, it remains to a great extent human-driven as long as the large tech organizations control most of the web traffic. The objective of Web 3.0 is to decrease the recurrence of such controls. Man-made brainpower is a significant part of the web since it recognizes authentic and fake activities.
- Blockchain Organization: Blockchain innovation is an essential trait of Web3. Decentralization is fundamental to web 3, which depends on blockchain innovation. Information is decentralized, and open, and can be appropriated utilizing blockchain innovation. Accordingly, clients own their information and can openly exchange it unafraid of losing possession, losing security, or depending on center men.

WEB2.0 VS WEB 3.

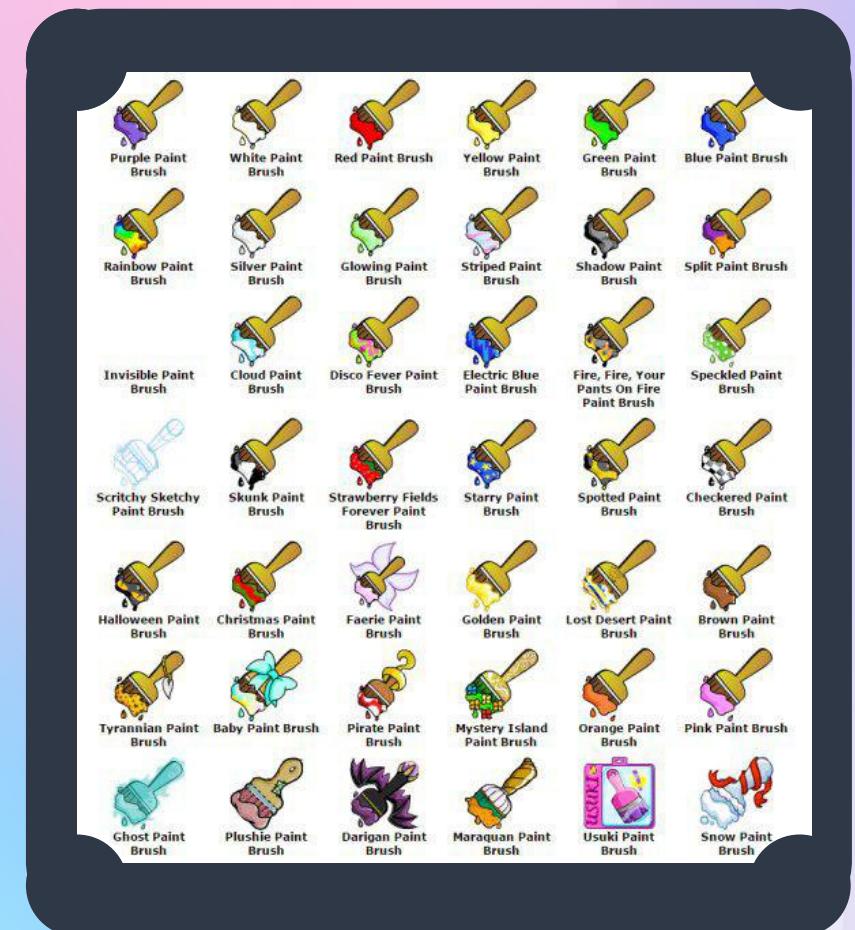

As associations gear up to ensure their business is lined up with web3 and the metaverse these are the unmistakable business contrasts somewhere in the range of web3 and web2.

Clients in the metaverse can utilize Web3's expected expanded reality to purchase or take on NFT pets in a decentralized way where nobody is proprietor except the right proprietor as opposed to in web2.0, where every authority ought to be moved yet not completely. Each pet has unmistakable attributes and utilizes stages like Decentraland. This permits clients to buy pets and walk them anyplace in the virtual world and do much more. Web3 reestablishes the decentralized techniques that Web2 killed, reestablishing command over business choices to shoppers and creatives. Web3 empowers distributed correspondence by killing the requirement for go-betweens and bringing together stages. Clients have some control over the blockchain conventions they use and own their information, character, content, and calculations by holding administration tokens. Clients partake as "investors" if they own the tokens or digital forms of money utilized by the conventions, rather than web2.0 where you pay with charge or Mastercards, not at all like digital currencies. "Throughout recent years, a great many clients have drawn in with Neopets characters in their virtual world and imparted it to their companions on versatile and work area. Indeed, even those that quit have helped the area by giving a scope of their marked products. Numerous cryptographic money fans and NFT authorities, a considerable lot of whom once participated in or were acquainted with Neopets as kids guess that new improvements in Web 3.0 would empower them to associate with them. At the point when Neopets is sent off to Web 3.0, purchasers will get the opportunity to experience and participate in the brand's

WHY VIRTUAL MONSTERS?

Our company token allows you, artists and investors, to buy and sell without the involvement of third-party or middle men and with no fraud. We want to make projects that don't require rug pulling. It is the future platform for artists, crypto dealers, and pet owners despite the racial background and financial background leading to gaining profit from our platform by owning a pet, feeding them, training them, and taking them on a stroll. Our users can earn unique Brush NFTs for pet grooming by playing a game or winning from a lucky draw. We provide various ventures like \$VIGIMON SWAP, \$VIGIMON MINER, and our unique 32 NFTs. This isolates our platform among others. Because mining is completely validated by smart contract validators, you will never lose the tokens you invest. The Virtual Monsters platform gives our users several chances to earn, invest, and work for the greater good.

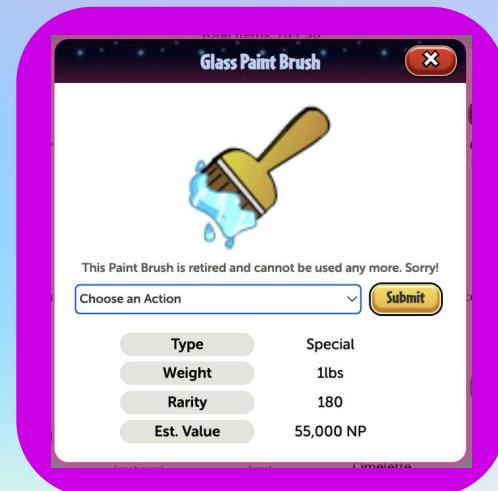

\$VIGIMON NFTS

All information relating to each NFT's creator, buyer, and transactions with it is securely stored on the blockchain. Each NFT is unique, only exists in a single copy, cannot be divided, and is distinct. In other words, an NFT is a digital certificate attached to a unique thing. NFT was created to move unique digital assets and virtual commodities to a safe blockchain format. In the virtual world, where they could change their skin tone, put on costumes, or visit the hospital in an emergency to be treated, each kind of pet would be taught combat battling. Food, water, and medical supplies would all be delivered by NFTS. When a pet is fed, any NFT, including food, water, and medications, will burn. If a pet dies and cannot be revived, the NFT will burn, indicating that the pet is lost forever.

PRODUCTIVE PERFORMANCE OF OUR PLATFORM

Our platform Virtual Monsters uses chain link technology to power NFT. Smart contracts can access random values with Chainlink VRF (Verifiable Random Function), a provably fair and verifiable random number generator (RNG), without sacrificing security or usability. Chainlink VRF creates one or more random values and cryptographic evidence of their generation for each request. Before any consuming applications can use the proof, it is published and confirmed on the blockchain. By using this procedure, it is ensured that no one party, including oracle operators, miners, users, or smart contract authors, may tamper with or manipulate the outcomes.

Each of the 32 pets, which have unusual identifiers, has special attributes, characteristics, and quirks. They will start as young pets, and their owner will have to Nourish, Educate, and Instruct them through scoring for them to grow. As was previously said, a pet that is malnourished may die from hunger or lack of energy. It cannot be revived when it has passed away. The only way to feed them is through utilizing web3.0 technologies. In the realm of pets, pet owners can use their animals for a variety of purposes. Because the CHAINLINK VRF technology will produce uncertainty, they can use the paintbrushes to customize their pets as needed. The (MINT & BURN) functionalities in the NFT smart contract will be utilized for all external NFTs, including food, medication, costumes, make-up, and weaponry. We will be using NFTX to create a vault for NFT holders to stake their NFTs and earn YEILD % in \$VIGIMON tokens, while the open pet world gets developed. VIGIMON TOKEN HOLDERS can stake their tokens in the miner to earn APY% daily,

\$VIGIMON SWAP

We can exchange our tokens for real-world cash. VIRTUAL MONSTERS swap is a platform that will be used to swap fiat currency. We use smart contract technology in our trading platform to keep our holders informed about token and fiat currency price variations and price ranges so that they can trade efficiently and attentively. The Vigimon Swap will be autonomous, unaffected by outside interference, and capable of exchanging \$VIGIMON for ETH or USDC without requiring access to UNISWAP or external swaps. This will boost the holders' pleasure. It'll be created and made accessible on the internet.

Standard exchanges and unfamiliar buys ordinarily include charges and trade costs. Since VIRTUAL MONSTERS SWAP has no middle-person organizations or government inclusion, the expenses of executing are kept exceptionally low. Any exchange happens rapidly, disposing of the burden of commonplace approval necessities and stand-by periods. THE VIRTUAL MONSTERS swap system enables you to quickly exchange one cryptocurrency for another without leaving their Blockchain, Wallet, and with meager transaction fees.

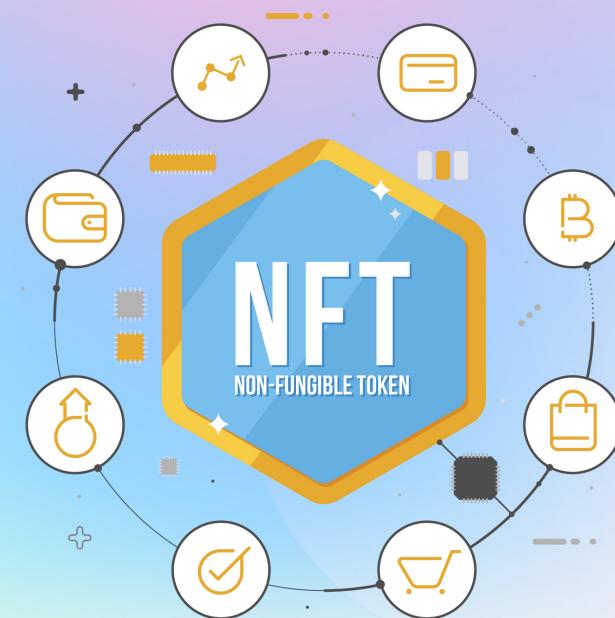

\$VIGIMON NFT STAKING

The VIRTUAL MONSTERS platform also presents an NFT Staking technique for making regular profits on your cryptocurrency portfolio. Node staking is also a form of passive income; When the minimum balance is met, a node deposits that amount of cryptocurrency into the network as a stake.

Staking cryptocurrency is purchasing and putting aside a particular amount of tokens to become a network-active, validating node. The buyer becomes a crucial piece of the network's security architecture merely by keeping these coins and is reimbursed accordingly.

We will be using NFTX to create a vault for NFT holders to stake their NFTs and earn YEILD % in \$VIGIMON tokens, while the open pet world gets developed

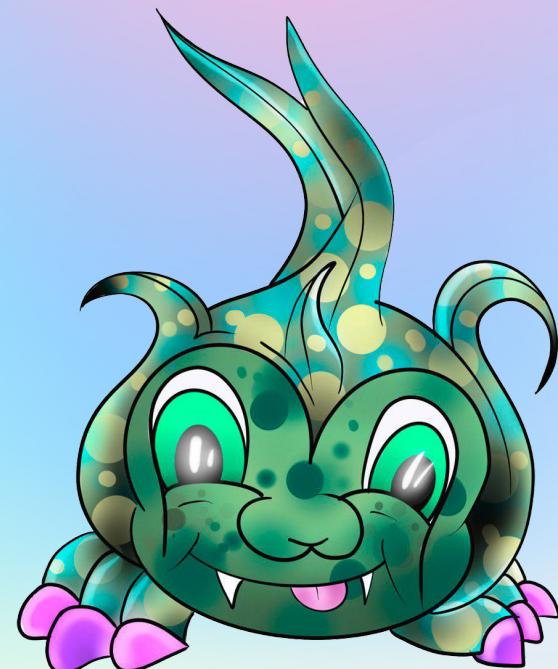

\$VIGIMON MINER

The innovation and society encompassing NFTs are likewise continually changing, bringing about new issues that have never been confronted. In any case, Virtual Monsters love a good challenge, that assists us with developing and taking an immense jump in our rundown of victories and makes us stands separated

The new NFT conveyance model has many issues, including the expense that is expected for running NFTs however we carried uplifting news to our clients that \$VIGIMON TOKEN HOLDERS can stake their tokens in the excavator to procure APY% day to day

To mint and transfer an NFT requires computational power, power, time, and work to transfer it onto the blockchain, which is fundamentally a computerized record. In any case, diggers can procure consistently with our novel tokenomics

TOKENOMICS

TOKEN DETAILS

When creating and deploying the contract, we decided to use the already-proven functional structure with built-in Reflection + LP acquisition + Burn in each trade. This contract structure has been proven to work well both to reduce potential dumps but also to be sufficiently rewarding to holders.

- Max Supply
- 1,000,000,000,000,000
- Burned (30%)
- Circulating (70%)

For each trade:

3% fee = redistributed to all existing holders

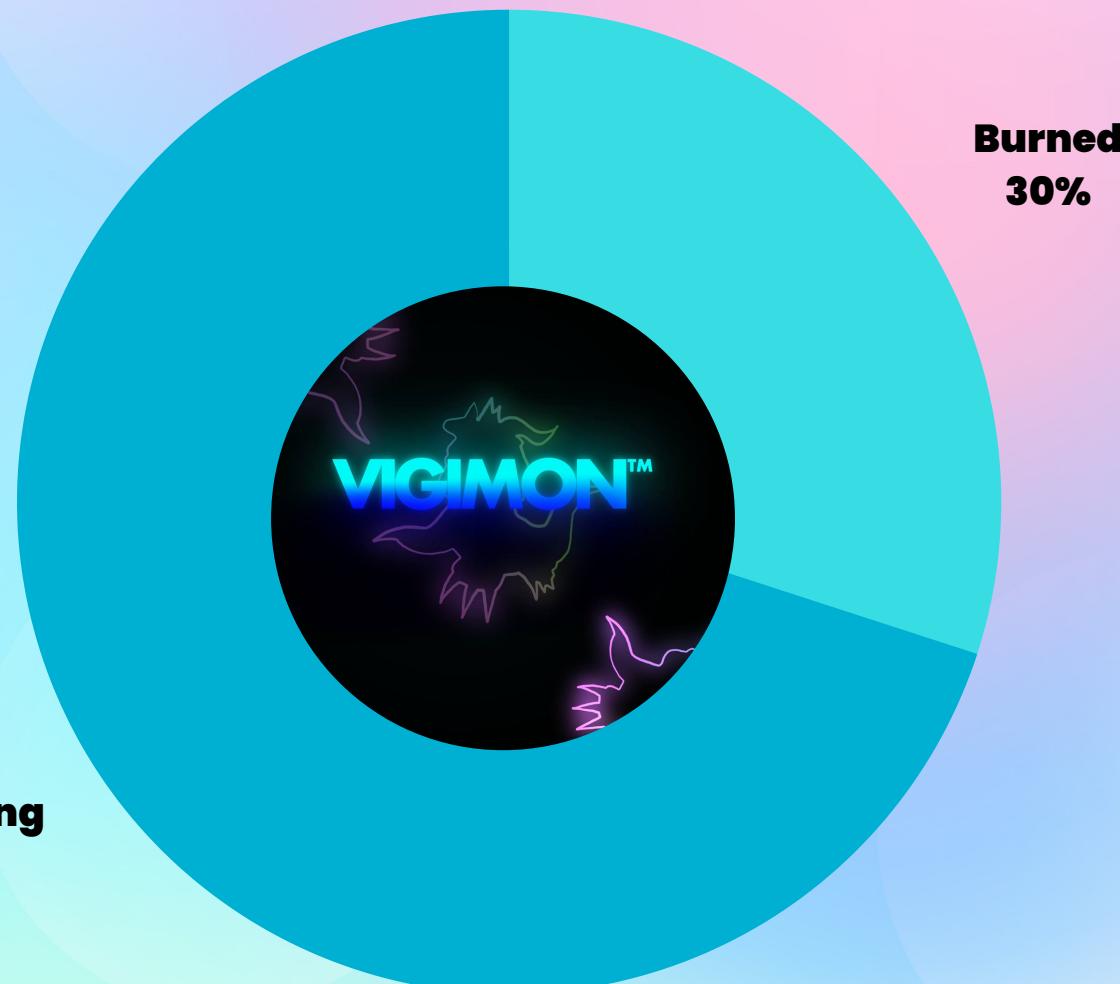

The 3% fee is split 50/50,

half of which is sold by the contract into BNB, while the other half of the \$VIGIMON tokens are paired automatically with the previously mentioned BNB and added as a liquidity pair on Pancake Swap

ROADMAP

- 
- 01** Launching Our website
 - 02** Release of the official Virtual Monsters token whitepaper
 - 03** Presale live on DXSales
 - 04** Listing on PancakeSwap
 - 05** Programmatic marketing on Poocoin
 - 06** Reach 1,000 holding addresses
 - 07** Audit Virtual Monsters Smart Contract
 - 08** Reach 5,000 holding addresses
 - 09** 1.Launch holder contest (\$1000)
 - 10** Virtual Monsters Token listed on CoinMarketCap
 - 11** Reach 10,000 holding addresses
 - 12** Reach 25,000 holding addresses
 - 13** Reach 50,000 holding addresses
